****Note: what's highlighted is what I've added to be addressed by the stretch goal of adding recipe tags****

Busy-Mom Emma

Demographics and background:

- 31-year-old female
- Married with two toddlers
- Dual household income of $85K per year
- Works full time as an elementary school teacher
- Lives in a single-family home in a suburban area near Birmingham, AL

Identifiers:

- Family-oriented and organized
- Enjoys and prefers home-cooking, but dislikes meal planning logistics
- Very budget-conscious when grocery shopping
- Values tools that save time and reduce stress, due to multitasking between parenting and work responsibilities

Goal:

- Emma wants a quick way to select several meals for the week and automatically generate a consolidated grocery list so she can shop efficiently and cook at home without stress. Emma also desires the ability to pick meals around her children's picky eating habits.

Budget-Conscious Brian

Demographics and background:

- 25-year-old male
- Single, no children
- Annual income of $75K per year
- Works full-time as a software engineer for a government contractor
- Lives in a small apartment in Huntsville, AL

Identifiers:

- Tech-savvy, comfortable using web applications and various software
- Learning how to cook, has not yet mastered his own list of personal recipes
- Prefers simplicity in recipes and meal-planning
- Enjoys trying new foods and recipes, but dislikes complicated planning
- Budget-conscious, saving money for his first home

Goal:

- Brian wants to plan affordable weekly meals and estimate grocery costs so he can stay within his budget and continue to save for his home purchase while learning to cook.

Organized Olivia

Demographics and background:

- 45-year-old female
- Married with three kids, two in high school and one in middle school
- Dual household income of $180K per year
- Works from home as a marketing specialist
- Lives in a semi-rural, large home away from the hustle and bustle of the city or even a larger suburb

Identifiers:

- Lives twenty minutes from the nearest grocery store, but orders online for pick up
- Loves to cook large meals at home
- Cannot reliably get to a restaurant, needs to ensure she has everything she needs at home to prepare food for her whole family for the week
- Can afford expensive grocery shops, values high quality ingredients over cost savings, and values having a variety of options of meals to cook at home
- Very health conscious and selective of what types of meals she prepares for her family

Goal:

- Olivia wants to plan a full week of meals for her family and generate a complete grocery list that ensures she has every ingredient needed, allowing her to shop once and cook a variety of high-quality meals at home without needing additional trips to the store.
